

# MANAGED SERVICES

BY SIERRA EXPERTS

Decrease downtime and increase budgeting predictability with cost-effective remote systems management solutions.

## Why Pick Sierra?

### End-to-End Systems Management

Sierra's device management services employ monitoring of all applicable monitoring points, ongoing management of operating system updates and anti-virus software, problem identification, problem resolution, and customer notification.

### Expert Engineering and Reliable Support

Our engineers have extensive experience with a variety of networking platforms. The expertise of our engineers, combined with their 24x7x365 availability, ensures that your IT infrastructure will be well maintained.

### Supported by Sierra Owned and Operated Infrastructure

Our systems management services are supported by our own secure and reliable data center and systems. We make sure our systems are available so we can do the same for you.

### Predictable and Budget Friendly

Sierra has the perfect solution for your company, and within your budget. We work with companies of all sizes and function, and would be happy to help you in your decision making process.

We do IT differently.
