

VOIP AND SIP SERVICES

BY SIERRA EXPERTS

Lower your phone bill with Sierra's reliable and feature-packed solutions. Sierra telephony systems serve businesses of all sizes and functions. Our customers save an average of at least 10 - 40% when they switch.

Why Pick Sierra?

End-to-End Service

Whether you're utilizing your existing phone system infrastructure or setting up an entirely new system, Sierra can help with every step of the process. We handle everything from configuration to monitoring and reporting, all while providing honest advice to find the best solution for you. Sierra is there for your business from start to finish.

Quality at a Low Price

Reduce the expense of phone system equipment and licensing, and keep your phone bill low with Sierra. Our small business customers who only switch current phone service to Sierra save an average of 10 - 40%, and the savings only increases the more complex your phone system currently is.

Reliable and Customized Service

With telephony solutions hosted at our Data Center in Downtown Pittsburgh, PA, you can feel confident that your phones will always work. Sierra Data Center boasts an impressive 99.999% uptime metric. We can help with plug-and-play extensions, and we even have an in-house, custom built call center application available.

We do IT differently.
