

• • A HIPAA X12 Enabled Application by Sierra Experts • •

## Why Pick ECHO by Sierra Experts?

### State Integrated

Once services, dates of service and durations are recorded within the application, ECHO generates claim files that can be submitted through the PROMISE™ portal. ECHO is also v5010 compliant and supports 837/835 forms for claim submission.

### Easy Data Access

ECHO makes data entry and approval simple, by allowing your staff to enter service information from anywhere an internet connection and web browser are available. In addition, once service information is entered by your staff, it is immediately made available to managers and supervisors for reviewing purposes.

### Simplified App

ECHO offers scalable licensing based on the size of your organization with a single, flat monthly payment. All you'll need is a web browser and internet connection to access the application meaning there is no need for servers or other infrastructure.

### Streamlined Billing

The ECHO payroll & salary management features help to streamline your organization's payroll efforts by providing a high-level overview of each employee's non-billable hours and expenses, as well as billable items such as services provided to clients. Also, improved functionality for residential billing allows for a more intuitive workflow.

### Customizable

Reporting is customizable and allows your organization to see the aggregate information in a way that makes sense to you and your staff. Sierra's team of senior level developers are able to build virtually any level of custom functionality and reporting that your organization may need.

We do IT differently.
